# LASER TECHNOLOGY FOR YOUR DOOR

# DESCRIPTION

The easy-to-install **FLATSCAN SW** uses time-of-flight laser technology for swing doors to generates 170 measurement points that provide a complete protection for swing doors and their users. A single **FLATSCAN SW** covers the entire door wing including the hinge area.

### COMPLIANT WITH EN 16005/DIN 18650

### INDEPENDENT OF FLOORING AND SURROUNDINGS

Laser technology guarantees independence of all type of flooring (slatted floors, wire mesh, absorbent carpet, reflective flooring, slippery surface, etc.) and the direct surroundings of the door (handrail, walls, radiators, etc.).

# PINCH ZONE SAFETY

The FLATSCAN SW covers the hinge area of a door to protect hands and fingers during the closing process. It counts 100 points, divided over 16° in the pinch zone.

# MAIN CLOSING EDGE SAFETY\*

The **FLATSCAN SW** extends its coverage beyond the door edges, for enhanced safety.

### ► FAST, INTUITIVE INSTALLATION

The size of the sensor area is defined by hand movement. Products do not have to be cut anymore to fit the doorframe.

# UNCOVERED ZONE

Thanks to the high precision of the laser technology, the uncovered zone can be reduced to 10 cm.

# COMPACT IN SIZE

The **FLATSCAN SW** can be used on any size of swing door. Thanks to its compact design ( $8.5 \text{ cm} \times 14.2 \text{ cm}$ ) it can be stock and stored easily.

Max. detection range 4 m (diagonal)

# INSTALLATION

•

.

•

.

- One module on each side is enough to secure the whole door, regardless of its size.
- Master-Slave function compatible with 4SAFE.
- The mechanical angle can be adjusted from 2° to 10°. •
- Specific adjustable settings thanks to 4 DIP-switches.
- Automatic teach-in: direct surroundings of the door and the type of floor. .
  - Left and right door sensors available.
  - Different colours available (aluminium/black/white). The cover can be fully painted.
